

ONE-PAGE OVERVIEW, AS OF 2026

MarCom OS: structure as code

A complete operating structure for marketing organizations adopting AI, so the tools serve the org chart instead of quietly replacing it.

The problem it solves

AI is being adopted bottom-up, one seat at a time. Output rises while the apprenticeship layer that turns juniors into seniors quietly disappears, tool spend accumulates with no owner, and nobody can show the board an operating model. The risk is structural, and it compounds while it stays invisible.

The three pillars

ORG SHAPE

The Hourglass

An org blueprint that protects senior judgment and rebuilds the path from junior to senior around AI-era work, instead of hollowing it out.

TOOLING RULE

Use / Compose / Build

A decision calculator that rules on every tool in the stack: adopt it, assemble it from what you have, or build it. Sprawl ends here.

GOVERNANCE

The Riverbank

Guardrail templates for AI-assisted work that legal and brand can live with: review standards, disclosure rules, escalation paths.

What is inside

- Foundation Playbook:** the full Tier 1 kit with the Hourglass blueprint, the Use/Compose/Build calculator, and Riverbank templates.
- Audit to Kill checklist:** a structured cull of tools, workflows, and deliverables that AI has made redundant. Often self-funding.
- Wedge Manifesto:** the argument, in writing, for restructuring deliberately rather than absorbing AI ad hoc.

Ways to engage

PATH	WHAT HAPPENS	INVESTMENT
Kit (self-serve)	The complete playbook; your team installs the structure at its own pace.	from \$149
Governance Risk Audit	Two-week structured review of where current AI use may expose the org, delivered as a written report. Fee credited toward the Sprint within 90 days.	\$1,500 to \$2,500
Transformation Sprint	Fixed four weeks: map, design, install, hand over. Ends with the structure live and the team briefed.	\$10,000 fixed
