

ENGAGEMENT PROPOSAL

The Transformation Sprint: **four weeks, installed**

Prepared for: [Client, Company]

Prepared by: [Your name], FDI

Date: [Date]

Valid for: 30 days

The situation

[2-3 sentences in the client's own words from the discovery call: how AI shows up in the team today, what has no owner, and what triggered this conversation.]

The engagement, week by week

- WEEK 1** **Map.** Tool, workflow, and review-practice inventory; interviews with [N] team leads. Output: current-state map and the Audit to Kill candidate list.
- WEEK 2** **Design.** Target Hourglass org shape, Use/Compose/Build ruling on the full stack, Riverbank guardrails adapted to your legal and brand constraints. Output: the blueprint, reviewed with you before anything changes.
- WEEK 3** **Install.** Governance templates adopted, review standards for AI-assisted work in place, kill-list decisions executed by your team with our support. Output: the structure, live.
- WEEK 4** **Brief and hand over.** Leadership briefing, team walkthrough, full artifact set handed over in editable form. Output: your team runs the structure without us.

Investment

\$10,000, fixed. Half on signing, half at the Week 2 blueprint review. Kickoff [date], handover [date]. Scope is fixed to the deliverables above; changes are a new agreement.

A lighter first step, if preferred: the Governance Risk Audit (\$1,500 to \$2,500 by team size) is a two-week structured review of where current AI use may expose the organization, delivered as a written report. The full audit fee is credited toward the Sprint within 90 days.

What this is not

No tool resale, no headcount recommendations delivered over your head, no open-ended consulting tail. The Sprint ends on [end date].
